	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Command that adds a entry for a trip to a local CSV file ● A command to read the file and give statistics on it like all time spending ● A command that reads the routes and gives the most used route	**Schedule - (For V2.0+)** ● A feature that filters the data in a specific timeframe ● Command that gives average cost per ride ● A tracker that tracks if you are saving money on your rides or not.
Not Important	**Delegate - (Use a library)** ● Auto generate the data and time stamp, like a built in date command so the user does not have to prompted to type it ● Sorting and counting the frequency of duplicate routes, look for like unix command that can do this.	**Delete - (Cut it)** ● A UI or a web dashboard ● LIve GPS tracking or connecting to the Veo API ● Auto scrape bank statements and find the veo charges.
